

GENE EXPRESS TECHNOLOGY HIGHLIGHTED IN NATURE

Toledo, OH, - April 27, 2006 – Gene Express, Inc. today announced that it has been featured in an article entitled “An expression of interest” published today by *Nature*, the world's foremost weekly scientific journal. The article focuses on the wide array of tools that scientists are currently using to study gene expression.

Gerald Vardzel, CEO of Gene Express said, “We are pleased that our *StaRT-PCR*[™] (Standardized Reverse Transcriptase Polymerase Chain Reaction) platform technology was among those recognized by *Nature*. Our sales to leading drug development companies and academic institutions have further validated the value we add to the entire development process.”

About Gene Express, Inc.

Gene Express, Inc. accelerates and enables drug development by providing standardized genomic data. The Company's proprietary and patented *StaRT-PCR*[™] (Standardized Reverse Transcriptase Polymerase Chain Reaction) platform technology for measuring gene expression levels in cells, tissue and blood is being used by numerous pharmaceutical concerns, as well as leading academic centers. The Company's \$3 billion focus market for licensing and contract services includes the drug development, academic and molecular diagnostics segments. Additional information is available on the Company's website at www.geneexpressinc.com.
